

Cape Biologix Technologies produces recombinant proteins using a plant-based transient expression platform. These proteins are suitable for Life Sciences and Diagnostic applications

QUALITY POLICY

MGT-001 v2

We commit to:

- Integrating a *quality and safety ethos* into every facet of our business.
- The principles of *reliability and consistency*. We commit to the consistent delivery of high-quality products that are subject to internal quality controls to provide our customers with confidence that they are reliable and fit-for-purpose.
- Exceptional customer-support services which places our *customer's needs* at the forefront of our business focus.
- Implementing and maintaining an *effective Quality Management System* which conforms to the requirements of ISO 13485 (Medical Devices - Quality Management Systems - Requirements for Regulatory Purposes).
- *Driving continuous improvements* to this system through effective planning, appropriate resourcing and managing according to agreed Quality Objectives.
- Interrogating every aspect of our business to reduce our *environmental footprint*.
